

About RBS

Rajadhani Business School, erstwhile the Department of Business Administration is one of the vibrant departments of Rajadhani Institute of Engineering and Technology (RIET) under the aegis of Indira Charitable Trust. It was established in 2013 with an intake of 60 which was upgraded to 120 in 2015. The B School offers a two-year full-time MBA program which is approved by the All-India Council for Technical Education (AICTE), New Delhi, and affiliated to APJ Abdul Kalam Technological University (KTU). Rajadhani Business School offers Finance, Marketing, Human Resources, Operations, and Information Systems as electives. RBS believes and strives to achieve holistic development of the individual who will contribute in the future not only as good managers but also as disciplined corporate citizens. The course delivery system is well composed of case discussions, presentations, seminars, industrial projects, and corporate interactions. The B School has excellent infrastructure and a learning environment with highly qualified faculty members with both academic and industry experience. The students are provided with free iPads for seamless learning, add-on certifications for greater employment opportunities, and an international immersion programme at the University of Putra, Malaysia.

About the Conference

The fifth Industrial Revolution is emerging and evolving at an exponential rather than a linear pace and disrupting almost every industry in every country. These changes signal the transformation of entire systems of production, management, and governance. Industry 5.0 could impact their business, several others are implementing changes and preparing for a future where smart machines escalating their business. The growing use of the Internet of Things (IoT) has driven cost reductions in sensors, controllers, and communications through high volumes of digital devices and value-added components. The manufacturing sector with its massive installed base of legacy equipment has also become an area of interest for the advances in innovative digital technologies. Meanwhile, the next level of innovation in manufacturing has been achieved, labeled by the term 5th Industrial Revolution, in short Industry 5.0. Industry 5.0 has its root in the concept of Industry 4.0. Thus, the key issues of the transition from Industry 4.0 to Industry 5.0 can be seen in the goal of making manufacturability sustainable from economic, ecologic, and societal perspectives. This requires building a circular economy with a focus on a human-centric industry.

The national conference on the theme of **Industry 5.0 in the Globalized Business Era** organized by Rajadhani Business School is to bring Researchers and experts from academics and industries on a common platform to discuss the latest emerging advances in the field of Science, Technology, Engineering, and Management in context with Industry 5.0. This conference will provide a forum for discussion to plan for the development of latest researches by academicians and industry in our country. It will discuss the impact of the transition to Fourth Industrial Revolution on the Infrastructure, Ecosystem, Efficiency and Competitiveness of industrial operation.
